1. Adoption of Agenda

(Consideration for Action)

Trustee Brownell moved and Trustee George seconded to approve the agenda as presented. Motion passed 5-0.

REPORTS AND COMMUNICATION:

Report from Closed Session - Board president reported no action taken in closed session.

Superintendent's Report - The Superintendent presented a report on recent Bright Spots happening around the district, including Red Ribbon Spirit Week, site Halloween festivities, the County Elections Department Voting Center in the District Office Board Room, and Veterans Day events honoring our community's servicepeople.

Celebrating Excellence in our Community - Lakeview Elementary Principal, Kathy Miracle, recognized Lora Watts and Lana and Alexis Bermudez, who designed and painted a new mural on campus.

Celebrating Excellence in Our Schools - Marina Village Principal, Levi Cambridge, provided a site update which focused on their sports theme this school year, emphasizing teamwork between staff and faculty. This school year, focuses on campus are "Positive Student Connections." Administrators, faculty and staff are rewarding good behavior, hosting 8th grade Lunch Chats, and promoting clubs and extracurriculars for enrichment opportunities. Students are also encouraged to choose methods of engagement suited to their abilities and preferences, such as Peer Tutoring, school government, and fundraiser event planning. Principal Cambridge also acknowledged the Board's commitment to prioritizing outdoor learning spaces and garden areas on campus.

Difference Makers honored were Karen Freed, MVMS Site Secretary and Laura Bardini, MVMS teacher of 29 years in RUSD and PC Pals Coordinator. Karen has worked at MV for 5 years, and is patient, has great judgment to rely on in running the school, shares humor and great service, is devoted and a true team player. Karen is a go-to person and always helpful. Laura leads the Sunshine team and has helped with Honor Society and inspires students to be the best version of themselves. Cares about staff and everyone individually.

Board Member Report - Board Clerk Suzanna George reported on the importance of district bylaws, specifically BB 9005 - Professional Governance Standards. She provided information on The California School Boards Association (CSBA) Masters in Governance program to equip local education agencies, board members and administrators with knowledge and skills to build teams, support employees, and create effective governing structures. Trustee George stated that school board members are among the oldest national category of public officials and should strive to be nonpartisan, thoughtful, fair and always represent the best interests of schoolchildren in their communities.

There were no public comments.

GENERAL:

2. Garden Presentation

(Presentation)

Lead Garden Coordinator Gina Johnston presented information on gardens at RUSD school sites. These outdoor learning areas are safe, clean and open spaces. Her team now has lesson plans for all sites and a lunchtime garden program with 15-85 students visiting each day at lunch. LF students spoke about composting, reducing food waste and helping plants thrive with soil nutrients. They are also repurposing items such as used tires for planter areas. The gardens have received picnic tables and more and were used in a successful garden tea party recently, enjoyed by students and all. LF has also used outdoor garden space for Apple Day, where kids built apple structures, painted apples and ate apples. The Jackson Garden Club meets after school and has 45 students. MVMS has experimented with tomato and cucumber seeds, hydroponics and found that frozen seeds germinate and grow faster than refrigerated. An MVMS student spoke about such garden science experiments and results. Scout projects also have helped RUSD outdoor spaces tremendously, with new fencing, smoother pathways, additions like a greenhouse, and mosaic art. Kaitlyn Shedd is doing a Girl Scout Gold Project and enlisted EDHFD to help clear areas and put in bark etc for native plants at LF. A garden updates newsletter is beginning this month for Supt and Board. A highlight is that a student aide created a sensory area for an SDC student that is helpful and beloved.

3. Update for Board Policies, Administrative Regulations and Board Bylaws

(Consideration for Action)

The Superintendent recommended the Board update and approve Board Policy and Administrative Regulation 5142.21: Administering Medication and Monitoring Health Conditions. Trustee White asked about parental notifications and the District's plan for emergency use only. Trustee Brownell commented on Rescue Union School District's prioritization of student safety and the fact that the District has had no known cases or instances of need to date. Trustee George expressed gratitude for the District's team of medical professionals. Trustee George moved and Trustee Brownell seconded to approve the Board Policy and Administrative Regulation updates for 5142.21. The motion passed 5-0.

4. CSBA Delegate Assembly Nominations

(Consideration for Action)

The Superintendent recommended the Board of Trustees consider nominations for CSBA Delegate Assembly. Nominations for CSBA's Delegate Assembly will be accepted until January 7, 2023. Any CSBA member board is eligible to nominate board members within their geographical region or subregion. Each board may nominate

as many individuals as it chooses. All nominees must submit a biographical sketch. An optional resume may also be submitted. No nominations were made.

There were no public comments.

Rescue Union School District

2022/23 Demographics and Enrollment Projections

EXECUTIVE SUMMARY

Rescue Union School District consists of five elementary schools and two middle schools. Rescue Union School District has experienced a slightly declining enrollment over the past ten years from an enrollment of 3,768 students during the 2013/14 school year to the current enrollment of 3,483 students. The enrollment numbers in this report do not include Non-Public School (NPS) students.

Rescue Union School District is projected to grow in enrollment by 2.56% (or 89 students) for the 2023/24 school year. The expanding TK program is projected to have an impact of 82 new TK students next year. The District is projected to have a growing enrollment over the next six years, with a projected 3,669 students in the 2028/29 school year. This is a total growth of 186 students, which is an increase of 5.34%. The expanding TK program is projected to have an impact of 191 new TK students over the next six years.

Future impacts from new housing development is predicated upon information provided by local municipalities on the development of 456 housing units over the next six years. If the building rates increase or decrease, then the timeline shown in this Study will need to be modified accordingly. These projected new developments in the District's boundary are expected to generate 20 students next year, or a total of 93 students in the next six years.

Based on current District loading standards and classroom space, the District has a net classroom capacity of 5,156 students, and a current enrollment of 3,483. This gives the District a current utilization factor of 67.6%. The projected utilization factor in six years will be 71.2%. This assumes loading standards remain constant and no additional facilities are built or removed.

This report includes the anticipated growth in the Transitional Kindergarten program to reflect the recent "TK for All" initiative which will allow a phased plan for all 4 year olds to attend TK over the next three years. The projections in this report assume TK will be offered at each elementary site as the numbers will justify classes for each campus.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted.

Ten Year Enrollment History and Six Year Enrollment Projections

This graph shows a summary of the projections for the entire District. It shows the current enrollment for 2022/23, the historic enrollment for the past nine years, and the projected enrollment for the next six years. The end result is a total of 3,669 students in the District in 2028/29. Non-Public School (NPS) students are not included in these enrollment numbers.

Non-Public School (NPS) students are not included in these enrollment numbers.

The Rescue Union School District has declined slightly in enrollment over the past ten years from an enrollment of 3,768 in 2013/14 to the current enrollment of 3,483.

This graph is color coded by grade groupings:

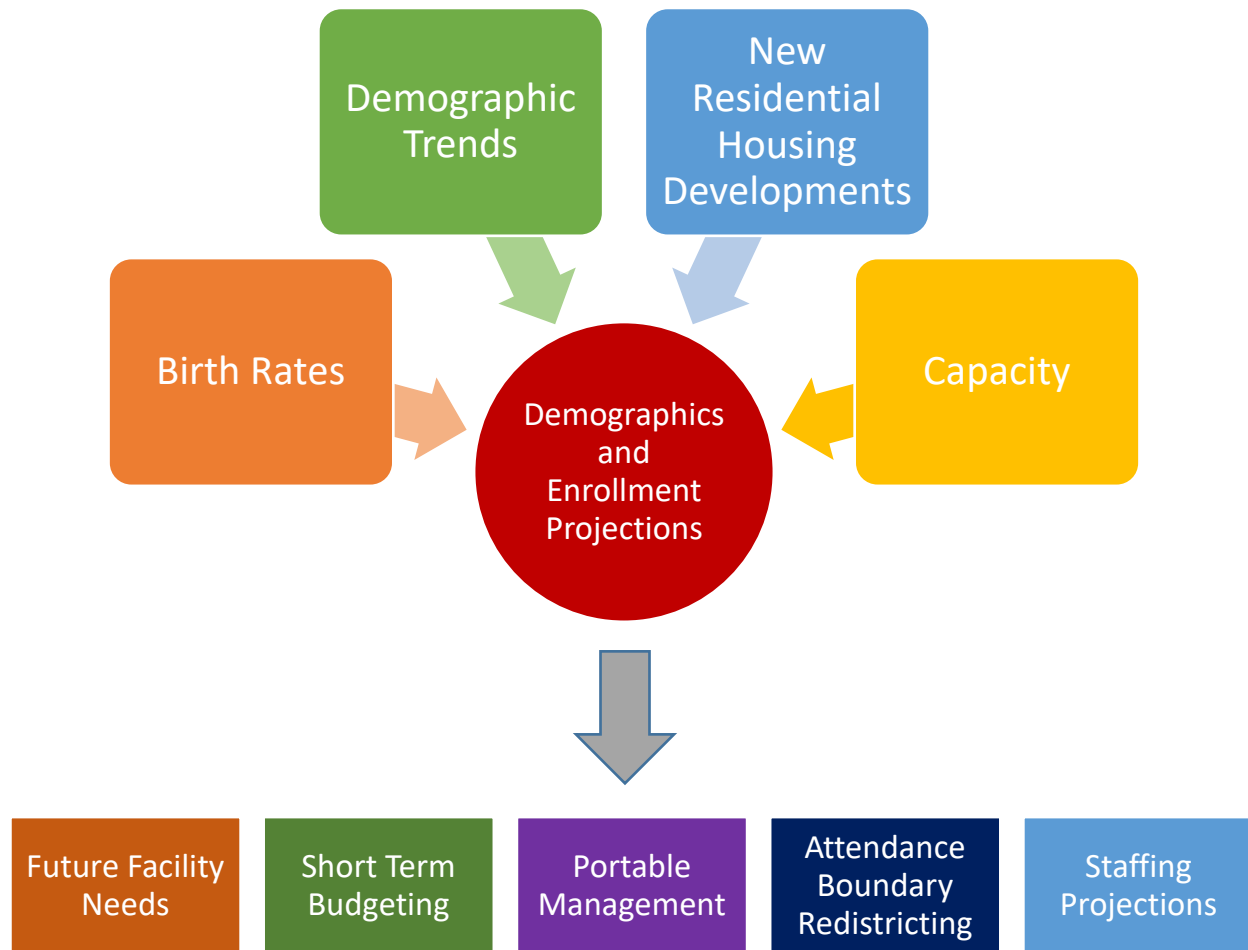

Orange represents the historic and projected enrollment for the elementary school grades TK-5.

Green represents the historic and projected enrollment for the middle school grades 6-8.

The entire District enrollment is shown at the top of each bar.

INTRODUCTION

This Demographics and Enrollment Projections Study provides a comprehensive enrollment analysis for the Rescue Union School District. The district-wide and school-specific enrollment projections are meant to serve as a planning tool to help with both long- and short-term planning. Demographic Studies examine the factors that influence school enrollments, namely trends in demographics, birth rates, and housing development. They are also used as a tool to identify certain facility planning requirements such as capacity, utilization of existing facilities, planning for modernization or new construction, and attendance boundary redistricting.

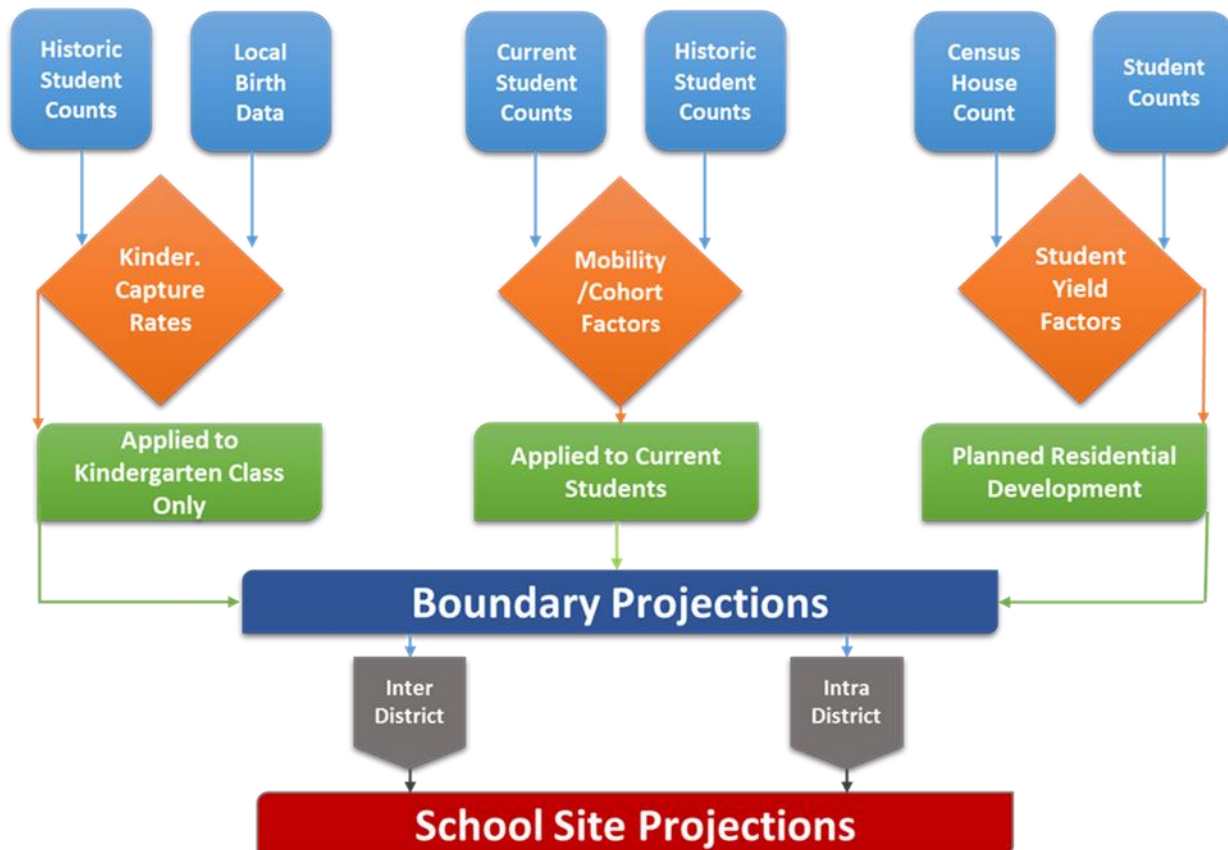

This Study provides information based on the 2022/23 District enrollments and programs, local planning policies and residential development. As these factors change and timelines are adjusted, the Demographic and Enrollment Projections Study should be revised to reflect the most current information.

METHODOLOGY

The chart below summarizes the inputs to calculate the boundary and school site projections.

The **enrollment projections** for each school are generated using a State standard weighted cohort trend analysis. The basic projections are created by studying the individual geographic areas. Once the trends are analyzed for each area, the base projections are modified using the following procedures:

- Birth rates** are used to project future kindergarten and transitional kindergarten enrollment. It is assumed if the births indicate there was an increase of 4% one year, then there will be a corresponding 4% increase in the kindergarten class five years later or the transitional kindergarten class four years later.
- New Housing Development rates** and **yield rates** are compared to the historical impact of development, and if the future projections exceed the historical values, the projections are augmented accordingly.
- Inter-District student** counts are not included in the base geographic trend analysis since these students reside outside of the District. Therefore, the current number of students-per-school and students-per-grade are added to the base projections.

2022/23 Demographics and Enrollment Projections

- d) **Intra-District students** are those who transfer from one school to another. The number of students transferring into and out of each school are calculated and used to determine the difference between the projections for students living in each attendance area versus those that are projected to attend the school.
- e) The projections for **special education students** and **alternative programs** are created by assuming those programs typically serve a percentage of the total District population. Therefore, as the District grows or declines, the enrollment in those programs would increase or decrease accordingly.
- f) **Cohort Trend Analysis:** The number of students living in the boundary are used to generate the cohort factors. The weighted average of the three years was determined with the current year weighted 50%, the prior year 33.3% and the last year 16.7%. This gives the current trends more value in determining the projections. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years.

Neighborhood School Attendance Area Analysis: Each school attendance boundary is input into our GIS (Geographic Information Systems) Software. Students are counted in each of the attendance area boundaries based on their residential address and can be studied to view optimum and balanced utilizations. Attendance pattern maps for each individual boundary will analyze impacts of intra-district transfers from within the district boundary, as well as inter-district transfers from neighboring school districts.

“TK for All” Initiative: This report models the growth projected for Transitional Kindergarten in alignment with the recent “TK for All” initiative which follows a phased plan to allow all 4 year olds to attend TK by 2025/26. This includes the assumption that TK will be offered at all sites that currently house K students. The expansion for TK enrollment is based on the following schedule:

- 2023/24 – 7 months (Adds 2 months)
- 2024/25 – 9 months (Adds 2 months)
- 2025/26 – 12 months (Adds 3 months)

DISTRICT BOUNDARIES

District Map with Student Residential Locations

This map shows the District boundary along with the location of each student based on their residential address. This geographic data is the foundation for our demographic analysis. Any red dots outside the District boundary will represent students attending one of the District schools or programs but have a residence outside the District. This map also identifies different areas of student population density.

Transitional Kindergarten

The Transitional Kindergarten (TK) program started in 2012 to provide an extra year for young children to get ready for kindergarten. Currently, the TK program allows four year-olds who will turn five between September 1 and February 2. Some districts allow parents with children just outside that window to also participate in the program. Since the window for the TK program is only five months, participation in the TK program is typically less than 40% of the total kindergarten enrollment. In most current state processes, such as CalPADS reporting, the State Building Program, and ADA, TK students are included with the kindergarten numbers.

As mentioned under "Methodology", this report addresses the growth of the TK program over the next three years to a full grade.

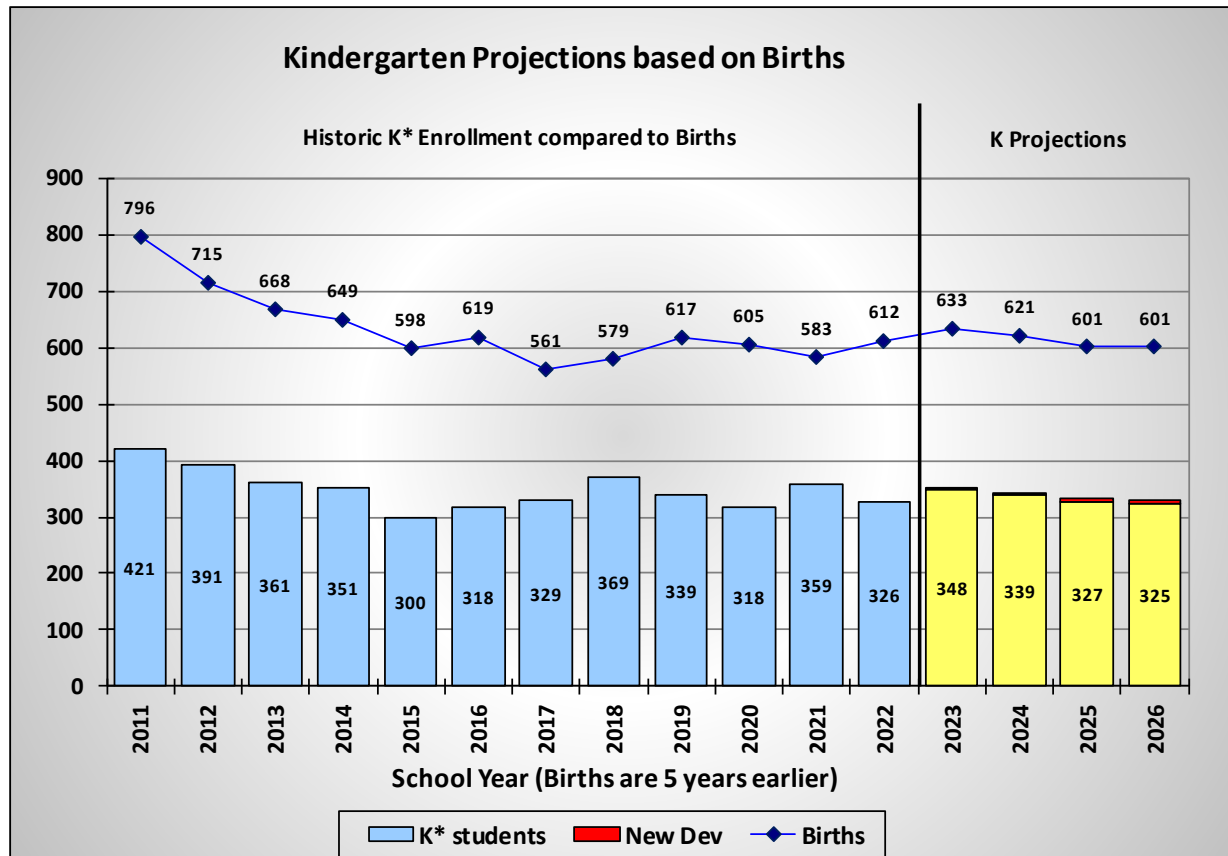

The TK projection for 2025/26 shows a total of 285 students and would be a full grade at that point.

DRAFT

HISTORIC BIRTH RATES

The following section is an analysis of the number of births in the Rescue Union School District. The number of births are compiled by zip code regions and provided by the Department of Health. The zip code areas do not exactly match the District boundaries and therefore the zip codes 95672, 95762, and 95682, which are in the District, were used for this analysis.

*Kindergarten Totals may include some Transitional Kindergarten students for some of the past years to more accurately correlate a 12-month period of births to a 12-month period of enrollment.

The above figure illustrates the correlation between births in the District area and the number of kindergarten students attending Rescue Union schools five years later. The number of births between 2006 and 2017 has averaged about 634 per year. The recent birth rates over the past four years (2018 to 2021), which will generate the kindergarten classes for the next four years (2023 to 2026), have been between 601 and 633. We have assumed that the average kindergarten capture rate of 55.16% will be maintained in the future.

DRAFT

Historic Kindergarten Capture Rates

This figure shows the kindergarten capture rates for the past 12 years. Since the birth data is derived from zip code areas, which do not exactly match with the District boundaries, the capture rate also accounts for differences in the coverage areas. Low capture rates are common when a district serves only a portion of a large zip code area. A large capture rate is possible when families move into the area after the children were born, but before they arrived for kindergarten. Overall, the District has had a stable capture rate with a 12 year average of 55.16%.

Retention Rates Since Kindergarten

This chart compares the original kindergarten class size to the current enrollment for each grade. For example, the current 6th grade class has 420 students and six years ago the kindergarten class had 318 students. Overall the class sizes have increased since kindergarten.

Totals	3,603	3,422	3,563	3,483	-6.0	25.2	0.0	7.4
Annual Change:		-181	141	-80				

This chart shows the enrollment by grade level over the past four years. The cohort values were calculated for each grade and each year, along with the weighted average for each grade. A positive cohort value indicates that grade is expected to have more students than the previous grade last year. A negative value would mean that the grade has fewer students compared to the previous grade last year.

In general, a positive cohort is representative of growth and a negative cohort indicates a decline in enrollment. There are some exceptions. First grade usually has a positive cohort, as there are some students that do not attend kindergarten at public schools but arrive in first grade.

Another important item to notice is the current breakdown by grade level of the student population. Comparing the number of students in the lower grades to the upper grades can indicate potential increases or decreases in future enrollments. Also, if there is a large class or a small class, it will slowly cause a ripple in the enrollments as it advances a grade each year.

Finally, the annual change at the bottom of this chart indicates the net impact of the changes in enrollment over the past few years.

Totals		1,324	456		

Assuming that 456 of the 1,324 planned units are completed over a six year period, there would be an average of 76 new housing units per year. To determine the impact of the new housing development, each new housing unit is multiplied by the student yield rate. Currently the District student yield rate is 0.271 students per housing unit based on the 2020 Census data. For purposes of the projections, we assumed that newly constructed homes with only get 75% of the Census yield rate. This breaks down as follows:

Rescue Union School District Student Yield Rate Analysis				
<u>Grade</u>	<u>2020 Students in District</u>	<u>2020 Housing Units</u>	<u>Census Student Yield Rate</u>	<u>New Home Student Yield Rate</u>
Total TK-5	2,214	12,623	0.175	0.132
Total 6-8	1,208	12,623	0.096	0.072
Total	3,422		0.271	0.203

Based on 2020 Census Data for school district.

The yield rate used for new construction eligibility determination in the State building program is 0.50 students per home for K-8 districts. The yield rate in the Rescue Union School District is lower than the State average.

CLASSROOM COUNTS AND CAPACITY

It is important to understand that capacity and classroom counts may be viewed different ways for different purposes. The State School Facilities Program (SFP) considers all available teaching stations excluding physical education facilities and core facilities (e.g., libraries, multipurpose rooms, and administrative spaces), as part of the site capacity when calculating eligibility for new construction or modernization funding. The State also has its own loading standards per classroom as part of the eligibility determinations.

Another method for calculating capacity and number of classrooms is based on local District standards of class size and a definition of what is considered a full day teaching station. The District may set aside several classroom spaces defined by the SFP for specialized programs or pull-out spaces.

The classroom counts and capacities defined in this Demographics and Enrollment Projections Study represent the rooms that have been identified by Rescue Union School District administration as designated fulltime teaching stations. This count is a net count and may not take into consideration other rooms which could be used as fulltime teaching stations but are needed for other programs offered by the District.

The classroom counts are shown for each school and are used to determine the capacity. The classroom counts represent the rooms that can be used for teaching purposes at each school site. The classroom counts may not represent the current classrooms being used, as there may be unused rooms on the school site. In some cases, there may be fewer classrooms counted than current teaching stations if some of the rooms being used were designed for other purposes but are currently being used as classrooms due to overcrowding.

The summary below illustrates the difference between the Gross classroom count and the Net classroom count.

SCHOOL PROJECTIONS

This Study provides a detailed analysis of student attendance patterns and enrollment for each school. This includes a boundary map illustrating that particular school's attendance patterns along with a chart showing the projected enrollment for the next six years. These charts indicate the actual enrollment at each school over the past four years along with the projected enrollment for the next six years. In addition, the number of students living in the boundary are shown for the same time period. If there are more students attending than live in the area, then there is a net inflow. If more students live in the boundary than attend the school, then there is a net outflow.

The current capacity is shown on these charts to identify if there will be classroom space available for the students. If space is not available, then the attendance patterns will likely need to change if the additional facilities are not provided. The capacity for each school was determined by using the following loading standards for each classroom identified:

<u>Grade</u>	<u>Loading Standard</u>
TK-3	24
4-5	30
6-8	31

These loading standards are based on the current loading factors used this year and may change based on the level of funding for schools in the future.

Detailed data is provided below each projection chart that shows the calculations of the cohort factors used to determine the enrollment projections for each school.

The number of students living in the boundary are shown, which are then used to generate the cohort factors. The weighted average of the three years was determined with the current year weighted 50%, the prior year 33.3% and the last year 16.7%. This gives the current trends more value in determining the projections. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. The kindergarten and transitional kindergarten enrollment is projected using the birth data instead of a cohort factor.

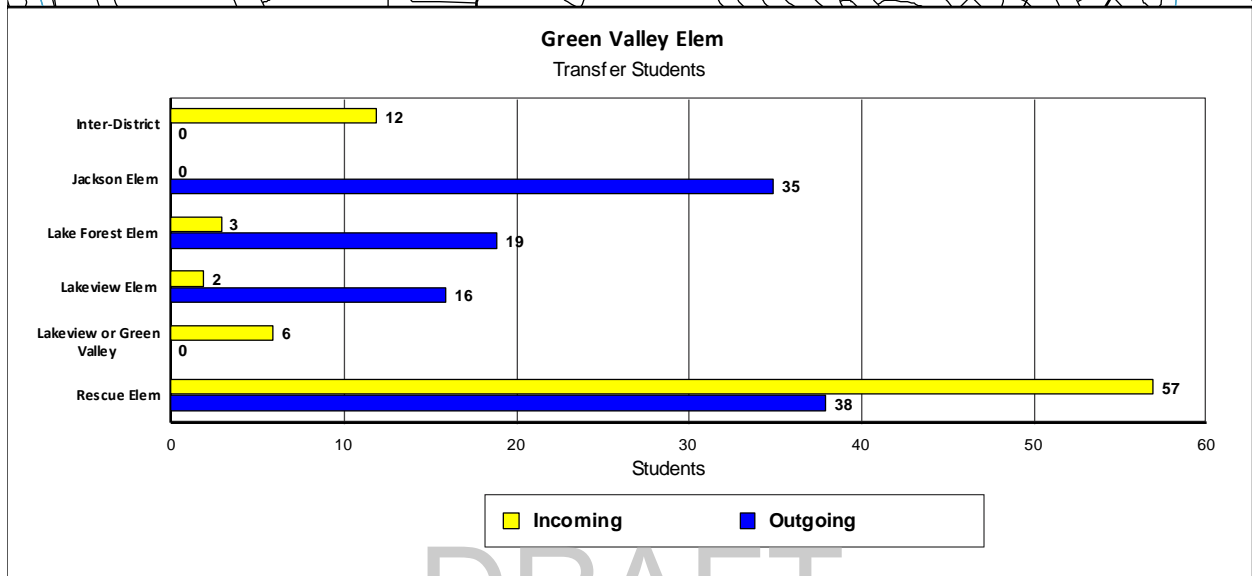

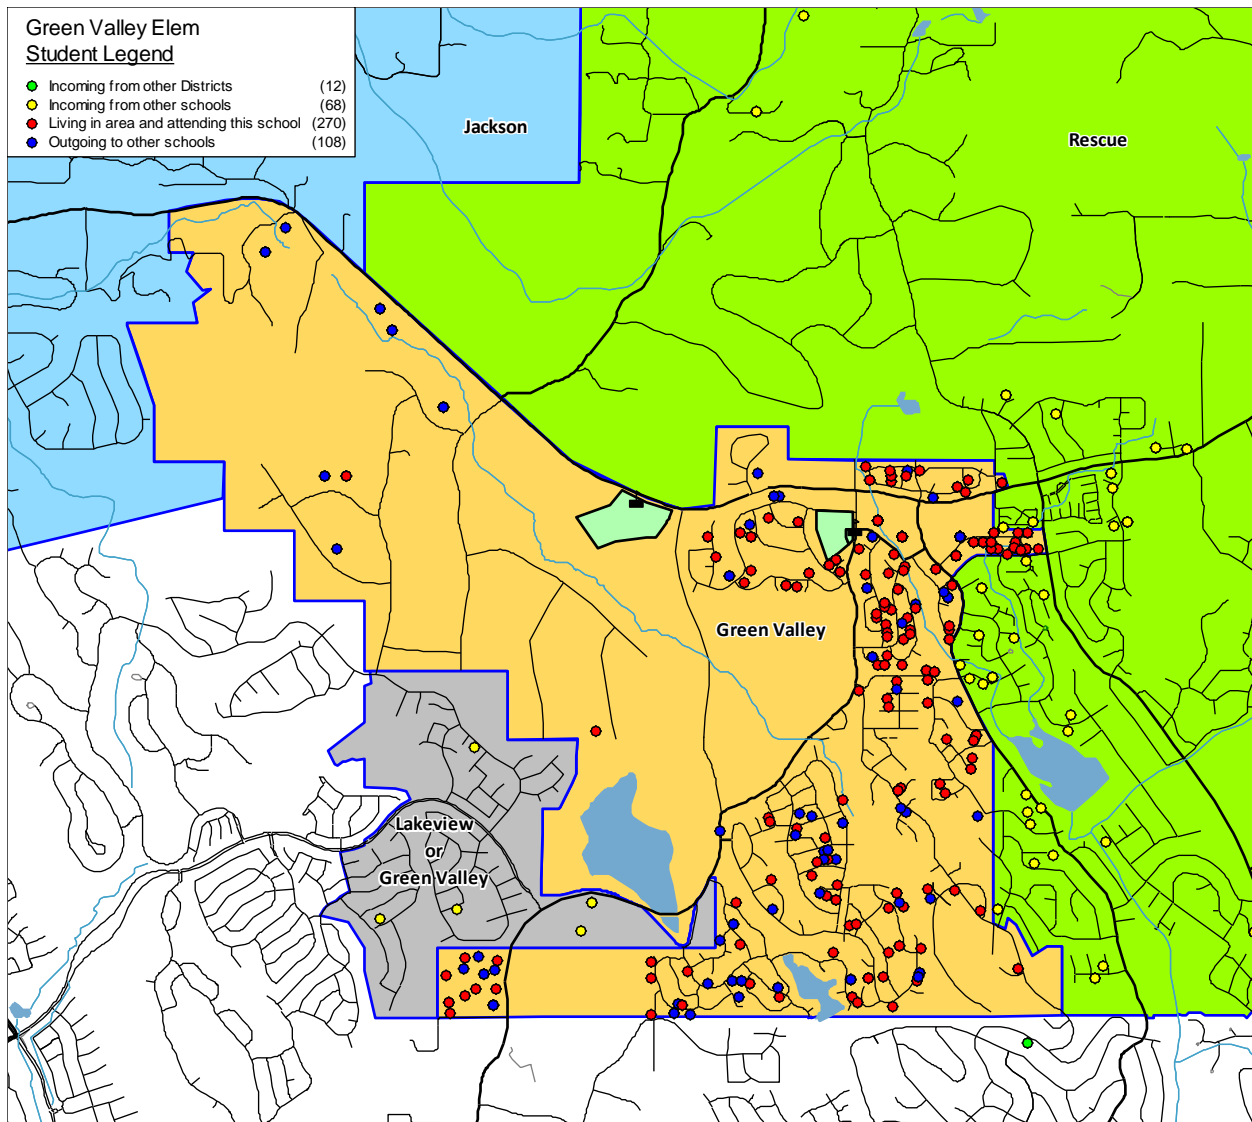

The Attendance Factors were determined by analyzing the current year of students to see how many Inter- and Intra-District transfers there are. Once the baseline projections are calculated for the residents in the attendance area, the Intra-District and Inter-District factors are applied to determine the projected enrollment for each school.

The last three columns in the chart, Current Enrollment, 23/24 Projection, and Net Change, show the current enrollment, next year's projection and net change in enrollment for next year. These are compared by grade to show the details needed for staffing and classroom needs.

This chart summarizes the transfers in and out of each school as were seen by the yellow dots and blue dots on the school attendance maps. In addition, the data has been analyzed to determine the total in-flow and out-flow rates for each school. The school with the largest in-flow rate is Lakeview Elementary and the school with the largest out-flow rate is Green Valley Elementary.

Student Residency and Enrollment Comparison

This chart compares each individual elementary school enrollment to the students that reside within the school attendance boundary. Utilizing this data helps make it easy to see which schools have the largest and smallest enrollments as well as which boundaries are most populated. Schools with more students enrolled than those living in the boundary have a net transfer into the school. This is typically found at schools with special programs such as Gate or Dual Immersion, schools housing students from overcrowded or Program Improvement (PI) schools, and schools with more capacity than the student population living in the boundary.

2022/23 Demographics and Enrollment Projections

Ten Year Enrollment History and Six Year Enrollment Projections

This graph shows a summary of the projections for the entire District. It shows the current enrollment for 2022/23, the historic enrollment for the past nine years, and the projected enrollment for the next six years. The end result is a total of 3,669 students in the District in 2028/29. Non-Public School (NPS) students are not included in these enrollment numbers.

Non-Public School (NPS) students are not included in these enrollment numbers.

The Rescue Union School District has declined slightly in enrollment over the past ten years from an enrollment of 3,768 in 2013/14 to the current enrollment of 3,483.

This graph is color coded by grade groupings:

Orange represents the historic and projected enrollment for the elementary school grades TK-5.

Green represents the historic and projected enrollment for the middle school grades 6-8.

The entire District enrollment is shown at the top of each bar.

Rescue Union School District has a current enrollment of 3,483 students. The projected enrollment for next year shows an increase of 89 students. This one year summary analyzes the net change between the current District enrollment by school and by grade, and the projected enrollment for 2023/24.

The students living in the boundary generate the cohort factors which are calculated for the past three years and the average is determined. Those cohorts are then used to determine the students who will be residing in each attendance area for the following years. Next the attendance factor is used to determine the net enrollment for each grade. The attendance factor is determined by analyzing the current year of students to see how many Inter- and Intra-district transfers there are. The cohort change factor indicates the change in the number of students for each grade compared to the number of students in the prior grade the previous year.

These projections assume the transfers between schools remain consistent. If changes in facilities, schedules, programs or policies are made, then the patterns may be impacted.

The actual enrollment for each elementary may vary from the numbers shown depending on which sites offer TK classes.

SCHOOL FACILITY UTILIZATION

The following chart shows the current and projected utilization rates for each school. It has been color coded with blue representing schools with a utilization rate of under 70%, yellow representing a utilization rate of at least 70% but under 80% and red for the schools that have over 100% utilization. The utilization indicates the long term impacts of the changes in enrollment as compared to the school capacities.
